

To whom it may concern:

I am writing in regards to the National Association of Broadcasters' (NAB) petition 04-160. I believe that this petition, which requests that satellite radio providers such as XM Radio should cease being allowed to broadcast services such as local traffic and weather, should be wholeheartedly rejected. This is absolutley ludicrous and is just another example of the ridiculous actions of bureaucracies such as the NAB. I pay for the excellent service that XM Radio has, and I believe I deserve I can listen to what ever they want to provide. The traffic and weather that XM radio provides is a lot better than local stations, and I am willing to pay for this service. It is also interesting to hear what is happening in other cities around the country. XM provides continuous traffic and weather, so it is more convenient than local stations that also provide news. Satellite radio is an ingenious idea, and, every since I bought XM, I never turn it off. I spread the word to others about how good this product is. XM should not be denied their first amendment right to freedom of speech.

Sincerely,
Andrew Litts
